

EUROFINS PHARMA BIOANALYTICAL OUTSOURCING PARTNER OF CHOICE

TRUSTED PARTNER OF CHOICE

The evolution to externalize more bioanalytical support has created opportunities to build even stronger partnerships with a specialist you can trust and to refocus internal resources. Our mission is to extend our clients' capabilities by combining scientific knowledge, capacity, regulatory expertise and flexibility to provide the trusted, relevant information required for the drug approval process.

Due to these changes in Pharma, there is a need to strategically move more bioanalytical work to a provider with the ***expertise you need and can trust***. With this shift of work from Pharma to CROs, talented bioanalytical scientists at Pharma are also migrating to Eurofins Pharma Bioanalytical Services to generate a great and sustainable partnership.

EXTENSIVE EXPERIENCE

- Over 15 years of combined large molecule bioanalytical industry drug development, clinical reporting, and support services
